

# MINE SIMULATOR

By: Yohib Hussain

# Main Menu

This is the main menu  
of the game with the  
Play , Credits and Quit

Mine Simulator

Play

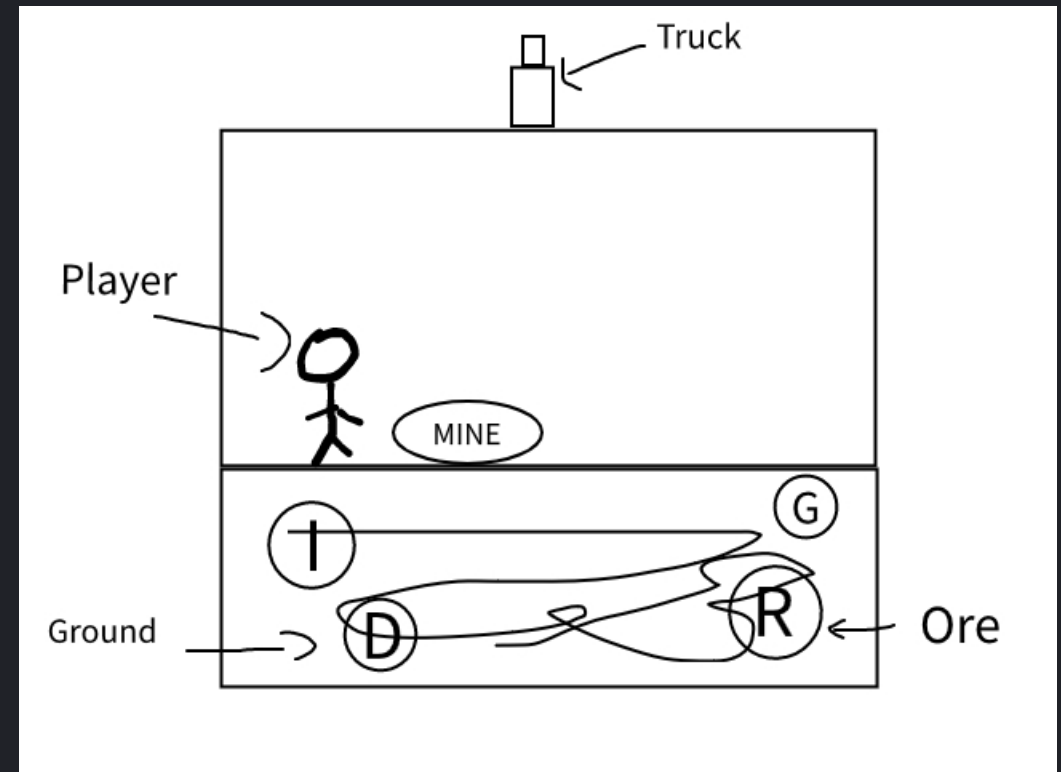

Credits

Quit

## Game Mechanics & Control

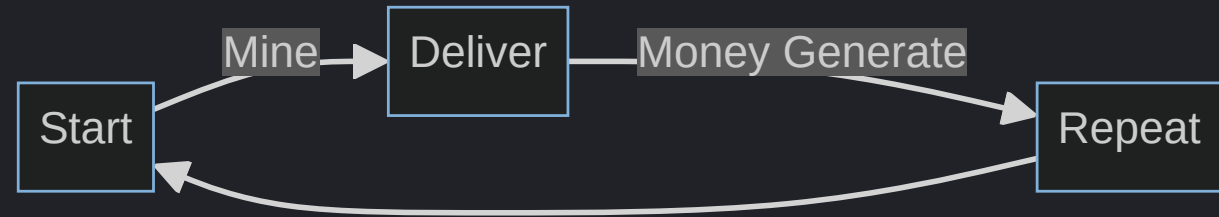

There will be a joystick to control the player the player can basically mine and collect mines like iron, gold, diamond, ruby and etc. Which are at different costs.

The player then can collect the minerals and place it in the truck which will generate the money basing on the mineral collected

# Game Loop

This is the very simple  
game loop

# Aestheticism in the game

- Kids will spend a little time on their own
- They will get some knowledge about the names of the ores
- They will get determined to complete the game
- The game is meant solely for children because of its repeated nature but even Adults can also enjoy playing the game with their little ones.

Everything in this document is made with [Marp](#), it is really good software for making presentation with code.

**Yes this is made with code**

**THANK YOU!**
